Ask a question about this product

Our spark plug tubes ensure 100% secure contact with the spark plug, with easy assembly / disassembly.

The sheet-metal half-Shell has four instead of three terminal boards, thereby the plus spreads only in the lower range and not easily over the whole length.

If fits perfectly safe and positive due to the use of Silicone with the contour cast of the spark plug. By slight pressure (spread in the lower third) the spring ring outside of the spark plug tube takes on the Task of ground contact to the spark plug. They do not hold the pin plug.

Easy assembly / disassembly.

No further ignition failure due to bad contacting.

HS Spark Plug Tubes consisting of (5 set or 7 set):

- Silicon rubber insulator made of high Quality industrial Silicon (car industry) - produced in Germany
- resistors
- contact springs - produced in Germany
- high Quality pressed half-Shell with four terminal boards
- mounting by us included

- List price* (incl. VAT, add. postage/packing)
  € 179,00 (5-Cylinder)
  € 249,00 (7-Cylinder)
  *) add. charge of € 70,- for engines with old black NGK-plugs
